

Product Backlog System Test Plan

Document Author: Kavya Vadla

Date: September 29, 2023

Introduction

Provide an overview of your system plan. Describe how a tester would start the system.

Test Files

Prove the contents of any test files that are needed for testing.

System Tests

Write at least 5 tests. We will grade the first five. Your tests should consider more complex scenarios than basic system startup and an invalid test file.

Test ID	Description	Expected Results	Actual Results
Add Product	Preconditions: 1. Start the ProductBacklog GUI 2. Click the "Add Product" button 3. Enter the name "Mining Simulation" 4. Press Add 5. Check Results	Mining Simulator is added to the end of the products list as an active product.	You don't need to fill this column out until P2P2!
Remove Product	Preconditions: 1. Start the ProductBacklog GUI 2. Click Mining Simulator product 3. Press Remove 4. Check Results	Mining Simulator is no longer listed on the product list	
Add Task	Preconditions:	Task is added to the end of the task list for WolfScheduler and	

	<ol style="list-style-type: none"> 1. Start the ProductBacklog GUI 2. Select WolfScheduler 3. Click Add Task button 4. Enter the following information for WolfScheduler: Conflict Failure Bug Fix krvadla ConflictException is not being thrown for Conflicts of time <p>Check Results</p>	given an id that is greater than the largest id number out of all of the tasks. Task is also in the backlog state.	
Delete Task	<p>Preconditions:</p> <ol style="list-style-type: none"> 1. Start the ProductBacklog GUI 2. Select WolfScheduler 3. Click Conflict Failure task 4. Click delete task <p>Check Results</p>	Task is no longer on the task list for WolfScheduler	
Delete non existent task	<p>Preconditions:</p> <ol style="list-style-type: none"> 1. Start the ProductBacklog GUI 2. Select WolfScheduler 3. Make sure no task is selected 4. Click delete task <p>Check Results</p>	A dialog is displayed with the message "No task selected."
