Product Backlog System Test Plan

Document Author: Kavya Vadla
Date: September 29, 2023

Introduction
Provide an overview of your system plan. Describe how a tester would start the system.

Test Files
Prove the contents of any test files that are needed for testing.

System Tests
Write at least 5 tests. We will grade the first five. Your tests should consider more complex scenarios than basic system startup and an invalid test file.

Test ID	Description	Expected Results	Actual Results
[Test 1] Add Product	Preconditions: 1. Start the ProductBacklog GUI 2. Click the "Add Product" button 3. Enter the name "Mining Simulation" 4. Press Add 5. Check Results	Mining Simulator is added to the end of the products list as an active product.	You don't need to fill this column out until P2P2!
[Test 2] Remove Product	Preconditions: Test 1 1. Start the ProductBacklog GUI 2. Click Mining Simulator product 3. Press Remove 4. Check Results	Mining Simulator is no longer listed on the product list	
[Test 3] Add Task	Preconditions:	Task is added to the end of the task list for WolfScheduler and	

	1. Start the ProductBacklog GUI 2. Select WolfScheduler 3. Click Add Task button 4. Enter the following information for WolfScheduler: Conflict Failure Bug Fix krvadla ConflictException is not being thrown for Conflicts of time Check Results	given an id that is greater than the largest id number out of all of the tasks. Task is also in the backlog state.	
[Test 4] Delete Task	Preconditions: Test 3 1. Start the ProductBacklog GUI 2. Select WolfScheduler 3. Click Conflict Failure task 4. Click delete task Check Results	Task is no longer on the task list for WolfScheduler	
[Test 5] Delete non existent task	Preconditions: Test 3 1. Start the ProductBacklog GUI 2. Select WolfScheduler 3. Make sure no task is selected 4. Click delete task Check Results	A dialog is displayed with the message "No task selected."
